Stealth-Kiosk *slim, simple, adaptable*

Stealth-Kiosk is a complete kiosk system with a slim and friendly design. It does not take up as much space as conventional kiosk does. The body is made from strong tubular steel construction to withstand public's use.

Stealth-Kiosk incorporates an all-in-one touchcomputer, therefore eliminating the need of bulky space for a PC and the cables that come with it. It runs Intel Pentium Dual Core or Core 2 Duo with blazing network speed of 10/100/1000 BaseT (WiFi optional.)

Stealth-Kiosk is ideal for self-service for product information, store locator, gift registry, order entry, customer service, labor management, library, or bookstore.

Specifications

Display	17" LCD, 1280x1024 resolution
Touchscreen	InfraRed or Intellitouch SAW
Processor	Intel Dual Core, upto Core 2 Duo 3GHz
Memory	1GB DDR2, upto 2GB
